# Introducing Pure Visage

The future of non-Invasive skin lifting is here

Pure Visage is the future of non-invasive facial treatments — combining two powerful skin technologies in one fully automated, hands-free procedure.

Using Synchronised RF and High-Intensity Low Frequency energy, Pure Visage works deep within the skin to lift, tighten, define, and restore volume — all without discomfort, downtime, or operator fatigue.

What makes Pure Visage a clinic favourite?

## **Hands-Free, Needle-Free Treatments**

Treat the full face, chin, and jawline in just 20 minutes with no operator fatigue.

## **Dual Technology = Faster Results**

Synchronised RF smooths and tightens, while low-frequency energy lifts and defines.

## **Incredible Earning Potential**

Charge up to £299 per session for full face and chin. Just 2 treatments per day can generate over £140,000 per year.

## **Loved by Clients**

Pain-free, non-invasive, and highly effective — it's everything today's facial clients are looking for.

**In just 20 minutes**, your clinic can deliver results that clients love:

- Smoother texture
- Reduced wrinkles
- A lifted, sculpted appearance
- Improved volume and elasticity
- Brighter, firmer under-eyes and jawlines

Designed for results-driven clinics, Pure Visage is ideal for anyone wanting to offer advanced, high-ticket facial treatments with minimal time and effort.

# Why Clinics Love Pure Visage

Pure Visage is a results-driven, revenue-generating solution

## **Lifting, Sculpting & Defining**

Restore youthful contours by targeting areas where the skin naturally loses firmness. Clients see a visible lift and improved definition across the cheeks, jawline, and neck.

## **Strengthens and Adds Volume**

Stimulates collagen and elastin to firm the skin and restore volume, perfect for clients looking to improve elasticity without injectables.

## **Improves Skin Texture & Smoothness**

Reduces fine lines, smooths uneven skin tone, and enhances surface glow for a fresh, rejuvenated complexion.

## **Reduces Double Chin**

Targets stubborn areas under the chin with focused, hands-free treatment, giving clients the tighter jawline they've been asking for.

## **Perfect for Dark Circles & Puffy Eyes**

Gently treats the delicate eye area to reduce puffiness, soften lines, and brighten tired-looking eyes.

## **Hands-Free & Easy to Operate**

Minimal staff involvement means you can multitask or offer other treatments at the same time. No manual work, no strain - just plug in and go.

## **Virtually Pain-Free**

Clients enjoy a relaxing, warm treatment with no discomfort, downtime, or recovery needed. Ideal for all skin types and sensitivity levels.

## **Quick 20–30 Minute Treatments**

Treat more clients per day with efficient, short sessions that deliver long-term results, helping you grow bookings without burning out your team.

# How Does It Work?

Two powerful technologies in one 20-minute session

Pure Visage uses Synchronised RF and High-Intensity Low Frequency Energy working together to rejuvenate, lift, and firm the skin from the inside out.

## **Synchronised Radiofrequency (RF)**

Delivers controlled heat deep into the dermis to stimulate collagen production and tighten the skin. Perfect for improving texture, smoothing fine lines, and firming sagging areas.

## **High-Intensity Low-Frequency Energy**

Targets the deeper layers of tissue to lift, define, and restore volume, especially in the cheeks, jawline, and under-eye area. Gives clients a visibly firmer, more sculpted look without the need for injectables.

## **Quick, Hands-Free Treatments = Maximum Clinic Efficiency**

In just 20–30 minutes, you can treat the full face, chin, and jawline — all while your team stays hands-free. This means more clients treated, more revenue generated, and less manual strain on your staff.

### **Ideal for:**

- Lifting & tightening the mid and lower face
- Reducing fine lines, wrinkles, and sagging
- Restoring volume to hollow areas
- Reducing puffiness and dark circles under the eyes
- Defining jawlines and softening double chins

This dual-action treatment delivers the results your clients want with zero needles, zero downtime, and maximum impact.

## Your Earning Potential

Premium treatments. Predictable revenue. Maximum ROI

PURE VISAGE	Area	Suggested pricing per session	Treatments per day	Weekly Revenue	Annual Revenue
	Full Face & Chin	£299	x2	£2,990	£143,520
	Eyes & Forehead	£150	x3	£2,250	£108,000
	Jawline + Lower Face	£199	x2	£1,990	£95,520

Figures based on a 5-day working week.  
Actual income may vary depending on treatment pricing and schedule.

Pure Visage allows your clinic to offer high-value, high-ticket facial treatments with sessions priced from £150 to £299+, depending on the area treated.

Because treatments are hands-free, you can treat more clients in less time, or even run multiple services simultaneously, making it one of the most time-efficient machines available.

### Repeat Treatments = Recurring Income

Pure Visage delivers visible, lasting results, but clients love to maintain their glow. That means more repeat bookings, more rebookings, and a reliable stream of income for your clinic.

With just a few sessions a day, clinics are earning over £100,000+ per year from Pure Visage alone - and that doesn't include upsells, add-ons, or combination packages.
